ניר נחמן גולדנברג

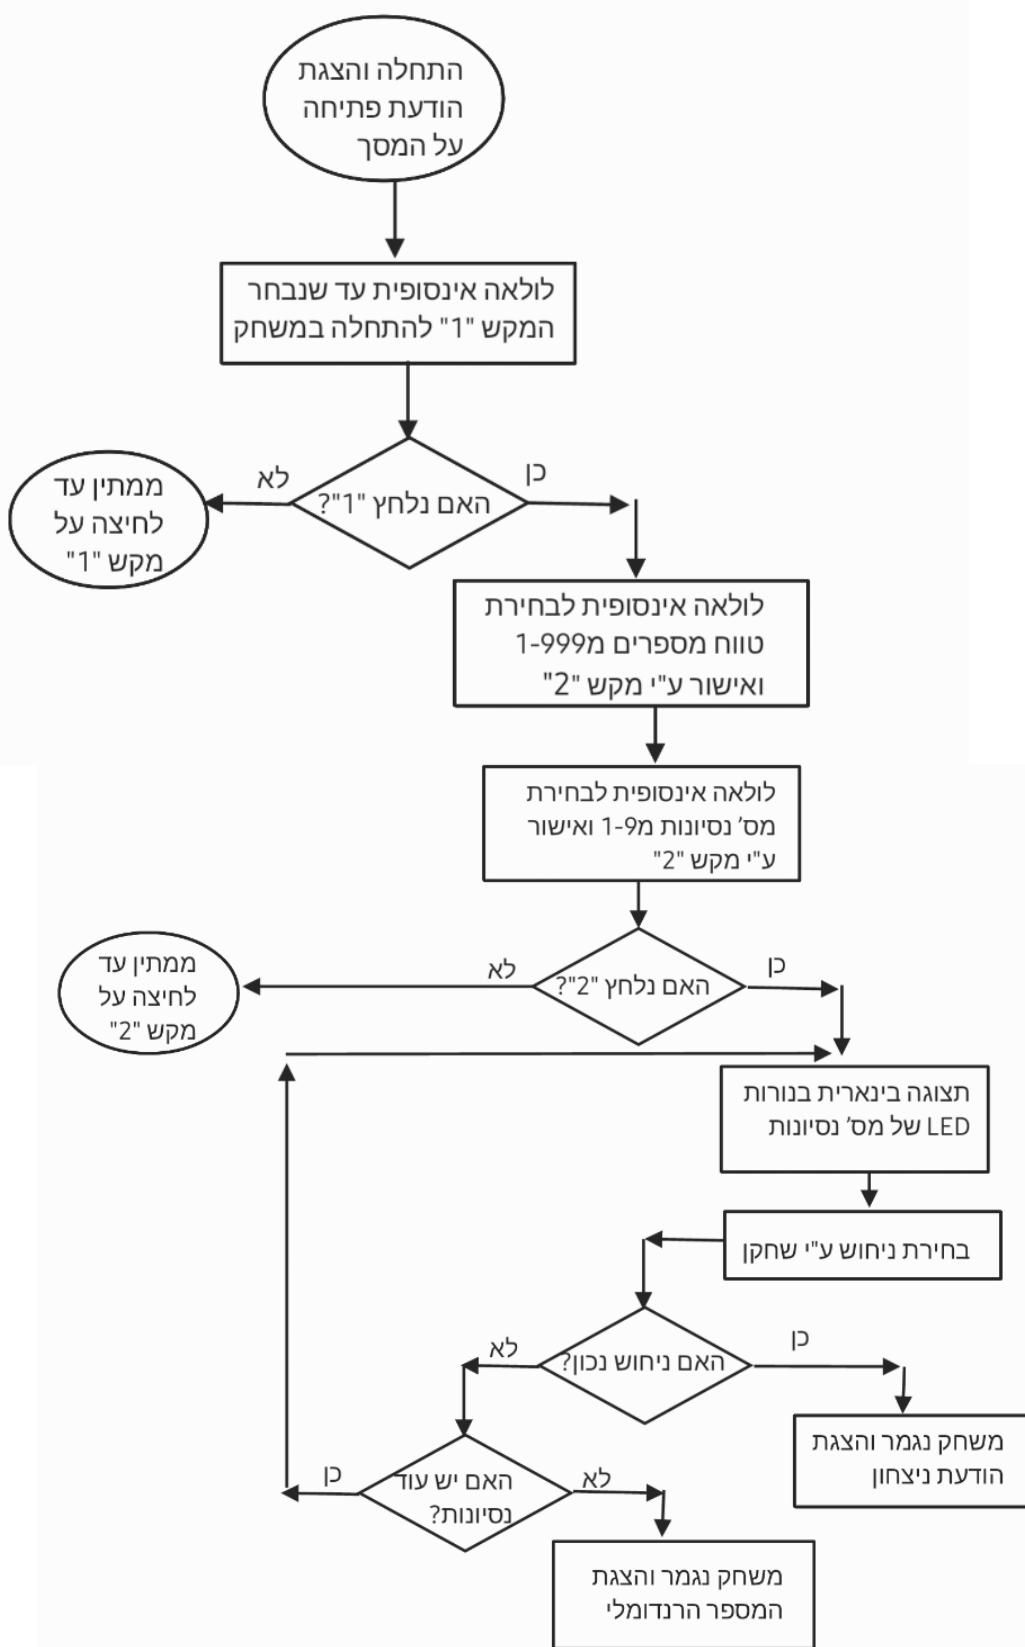

תקציר:

התוכנית מתארת משחק "ניחוש מספר", הכוללת תצוגת LCD ונורות LED. עם התחלת התוכנית, מוצגת הודעה כניסה והוראות ראשוניות. המשתמש לוחץ על כפתורים כדי לבחור טווח מספרים ומספר ניסיונות לניחוש, אשר נקבעים בעזרת מדידות אנלוגיות. מספר רנדומלי נבחר בטווח שנקבע, והמשתמש נדרש לנחש אותו תוך מספר מוגבל של ניסיונות.

בכל ניחוש, התוכנית מציגה את הניחוש הנוכחי, מצב הניחוש (גובה או נמוך מדי), ומספר הניסיונות שנותרו באמצעות תצוגת LED והודעות בהתאם בצד LCD.

אם המשתמש מצליח לנחש את המספר, מופיעה הודעה ניצחון, אחרת, מופיעה הודעה הפסד עם המספר הנוכחי. נורות ה-LED-מתעדכנות בהתאם להתקדמות המשתמש המשחק, כולל הבהיר עבור ניסיון ניחוש והציג מספר הניסיונות שנותרו.

תרשים זרימה לתוכנית:
